RE: Dismissal of Applications

Dear Mr. Scherman:

My April 25, 2008 letter to you stated that we were suspending review of the Quoddy Bay LNG Import Project pending receipt of the material identified in our October 11, 2007 Information Request. The letter indicated that staff could not proceed with its engineering review or with the preparation of the draft Environmental Impact Statement due to Quoddy Bay LNG, LLC's (Quoddy Bay) incomplete responses.

To date, Quoddy Bay has not provided the previously requested information; nor has Quoddy Bay provided any further information regarding the possible revisions to the project design disclosed in its February 29, 2008 filing. Therefore, I am dismissing your application for the construction and operation of an LNG import terminal in Docket No. CP07-38-000, in accordance with Section 157.8(c) of the Commission's regulations. In addition, I am dismissing Quoddy Bay Pipeline LLC's applications for the construction and operation of the Quoddy Bay pipeline, a blanket certificate to perform certain routine activities and operations, and a blanket certificate to provide open access firm transportation services in Docket Nos. CP07-35-000, CP07-36-000, and CP07-37-000, respectively, as they are dependent on the application in Docket No. CP07-38-000.

This dismissal is without prejudice to Quoddy Bay filing a new application in the future if Quoddy Bay is able to finalize its design and provide a complete application. However, in accordance with the Commission's regulations, it will be examined as a new proceeding.

Sincerely,

J. Mark Robinson
Director
Office of Energy Projects
